

PGY1 Pharmacy Residency Graduates

The ASHP-accredited Endeavor Health Swedish Hospital PGY1 Pharmacy Residency Program offers 4 resident positions annually. Following successful residency completions, graduates have pursued clinical hospital positions as well as various career/specialty paths such as infectious disease, cardiology, critical care, ambulatory care, emergency medicine, oncology, informatics, administration, and managed care. Many pursued advanced training in PGY2s/fellowships and/or completed board certification and now serve as residency program directors/coordinators, managers, and pharmacy residency preceptors throughout the United States.

Take a look below to see where our residents accepted positions directly after completing residency at Swedish Hospital.
